Unduh 5 Cm Dilated Castor Oil At 4

Ive done research on it but i just mainly wanna know how much of a chance do i have of it working? And yes i know everyones gonna be telling me how bad of a mother i am just save it my sis in law used it and the baby was fine.. The best way to avoid a c-section is to NOT get induced, to let nature take its course, and resist hospital intervention like an epidural or c-section.. Im 4cm dilated fully effaced the babies head is right there ive been having very painful contractions for a while now just not consistant enough, i was told to try castor oil but it doesnt always work i just took some, what do you think my chances are of it working? My mom wouldnt dialate passed 4cm so if i dont.. Take several small doses (1-1 5 tablespoons) of castor oil 3-4 hours apart rather than one big dose.. Best Answer: Want to know the 'science' behind castor oil?If you take castor oil, it'll give you wicked diarrhea.. Im 4cm dilated fully effaced the babies head is right there ive been having very painful contractions for a while now just not consistant enough, i was told to try castor oil but it doesnt always work i just took some, what do you think my chances are of it working? My mom wouldnt dialate passed 4cm so if i dont dilate anymore then i will be having a c section in a few days and DO NOT want that.. If you are at 4 cm and flly effaced you will have a quicker labor when your body is ready.. So, even if having the sh-ts DID give you contractions, do you really want to be dehydrating yourself and shitting your brains out while laboring? Sorry, dangerous and stupid.. Add to orange juice in a mason jar and shake vigorously Boston - Cambridge - Newton, MA-NH Spokane - Spokane Valley, WA; Durham - Chapel Hill, NC; Lakeland - Winter Haven, FL.. The gas and feces exiting your intestines will brush against your uterus (through your intestines) and set off contractions.

Ok firstly if you do not desire to be induces then do not take castor oil castor oil will do this.
